

● AI-NATIVE WORKFLOW & COMPLIANCE AUTOMATION

Intelligent systems for regulated, mission-critical teams

Agnis Labs builds cloud-native platforms that automate workflows, compliance, and decision-making for healthcare, finance, and other high-stakes environments — where reliability, auditability, and security are non-negotiable.

● AUDIT-READY REPORTING

SOLUTIONS

● PLATFORM

Intelligent Workflow Automation

Orchestrate work across tools, teams, and environments. Reduce manual handoffs, eliminate bottlenecks, and give technical teams real-time visibility into operations.

Ideal for engineering, DevOps & operations teams.

● COMPLIANCE

Compliance Automation

Operationalize SOC 2, HIPAA, and internal controls with automated checks, evidence collection, and reporting embedded in day-to-day workflows.

For teams preparing for audits or maintaining continuous compliance.

● CUSTOM

Custom Platforms & Integrations

Build tailored systems around your existing tools, data, and cloud. Create a cohesive backbone for engineering, operations, and compliance workflows.

From targeted integrations to full greenfield platforms.

● ANALYTICS

Analytics & AI-Driven Insights

Detect anomalies, surface risks, and optimize performance. Move from reactive reporting to proactive, data-backed decisions using multimodal AI.

For leaders needing trustworthy, near-real-time operational signals.

● ADVISORY

Architecture & Implementation Advisory

Design, validate, and implement scalable, secure architectures aligned to regulatory and business requirements, led by hands-on engineering leadership.

Deep cloud & distributed systems experience.

● ENABLEMENT

Enablement & Ongoing Support

Training, documentation, and collaborative iteration to ensure your teams can operate and extend the platform confidently over the long term.

Focused on long-term ownership by your internal teams.

ABOUT

Agnis Labs is an intelligent systems company founded in 2025, based in Hoffman Estates, Illinois. We design AI-native, cloud-based platforms that automate workflows and compliance for regulated industries.

We help technical and compliance teams replace fragmented tools and manual processes with cohesive, automated systems — enabling organizations to move faster while staying audit-ready.

Leveraging deep expertise in cloud-native architectures and distributed systems, we design for scalability, resilience, and security from day one.
